*All the crutches above come with standard aluminum anodized tubes for an additional \$20 you can choose from our limited variety of powder coated colors. Please contact us for the colors available.*

Imported exclusively by Award Prosthetics from Germany for the North American market. The removable handgrips are fastened to the plastic handle with a threaded screw, using a 6mm Allan Key. Ensure that these remain tightened, especially if you exchange the handgrips from time to time. A nylon strap held on with snap studs is used to prevent you from dropping the crutches while removing your hands from the grips. This will allow you to "carry" the crutches. Replacement straps are \$5.00/pair.

Neoprene rubber sleeves can be purchased for the non-anatomical handgrips at a price of \$8.00/pair. Please specify 3mm or 5mm thickness. These come only in black. Replacement rubber handgrips are \$18.00/pair for the round, ergonomic soft and \$20.00/pair for the anatomical soft style. We also carry ice grip tips, which can be slipped over top of the regular tips. They are priced at \$38.00/pair. Another item that's popular is the square (70x70mm) "non-slip" rubber pad, which can be installed instead of the regular tips to increase gripping

capacity on wet, soft and slippery surfaces. These are priced at \$70.00/pair. Standard replacement crutch tips are \$6.00/pair.
